\* **For medium to large breed puppies under one-year-old:** IF your dog is already over 30 lbs at time of reservation please add an estimated weight for date of surgery - 1.5 lbs per week for medium dogs, 2 lbs per week for large dogs & 2.5 lbs per week for extra large dogs.

**Example: Bully breed dog, age 4 months, current weight 30 lbs, clinic is 2 months away. Eight weeks @ 2 lbs per week = 16 lbs. Current weight is 30 lbs + projected weight of 16 lbs = 46 lbs.**

Since we have limited room for dogs between **40 lbs - 65 lbs**, be sure to ask for one of these slots. They go quickly. If your dog is not reserved in one of these slots and is over the maximum weight limit on day of clinic, surgery will **NOT** be performed. If you have been slotted for the **40 lbs - 65 lbs** and your dog is over the maximum weight on day of clinic, surgery will **NOT** be performed.
